

## PRASHANT PRASAD KANTH

kanthprashant9@gmail.com | New Brunswick, NJ

Ph: (848) 437-1577 | Portfolio: [kanthprashant.github.io](#) | LinkedIn: [prashantpdkanth](#) | GitHub: [kanthprashant](#)

### EDUCATION

|   |                            |
|---|----------------------------|
| <b>MS, Computer Science</b>   Rutgers University-New Brunswick (CGPA: 4.0)                    | <b>Sep 2021 - May 2023</b> |
| <b>BE, Computer Science and Engineering</b>   Bangalore Institute of Technology (Percent: 77) | <b>Aug 2013 - Jun 2017</b> |

### PROFESSIONAL EXPERIENCE

|  |                            |
|--|----------------------------|
| <b>Artrendex</b>   New Jersey, US  | <b>Jun 2022 - Sep 2022</b> |
| <i>Machine Learning Research Intern (stack: Python, PyTorch, OpenCV, Tensorboard, Numpy, Pandas, skimage)</i>  |                            |
| <ul style="list-style-type: none"><li>Improved reusability of data pipeline by generalising pre-processing and overriding PyTorch's Dataset class to reduce manual labor by 10%.</li><li>Applied transfer learning technique on deep learning models like VGG, achieving 94% test accuracy in art classification.</li><li>Researched on positional embedding options and explored 3D CNN variation of Resnet, 'R3D-18', for art classification.</li></ul>  |                            |
| <b>Oracle</b>   Bangalore, India   | <b>Jul 2017 - Jun 2021</b> |
| <i>Cloud Consultant (stack: Oracle SQL, Relational Databases, Java, Python, sklearn, Gensim, NLTK, Oracle BI, MS Excel, XML)</i>   |                            |
| <ul style="list-style-type: none"><li>Managed end-to-end integration and report development, mitigating risk to ensure successful delivery.</li><li>Built an error analysis tool by utilising a meta-classifier with LogisticRegression and MultinomialNB achieving 92% accuracy on error classification, reducing manual error analysis by 75% during data migration.</li><li>Developed over 50 SQL reports analysing data from multiple tables, providing insights into critical business functions.</li><li>Remodelled Java automation program by integrating with REST APIs, reducing manual data migration effort by 20%.</li><li>Conducted training sessions to equip over 40 new hires with the skills and knowledge to drive organizational success.</li></ul> |                            |

### PROJECTS

|  |                            |
|--|----------------------------|
| <b>Virtual Trial Room</b>   (stack: Python, PyTorch, Flask, OpenCV, PIL, Mediapipe, NumPy, Javascript)   | <b>Mar 2023 - Apr 2023</b> |
| <ul style="list-style-type: none"><li>Performed hyperparameter tuning to train a virtual try-on network, enabling it to accurately warp a source garment onto a reference human body and synthesize photorealistic images.</li><li>Created a streamlined pipeline for rapid model inference, incorporating pre-processing steps such as body segmentation and keypoints generation.</li><li>Designed resilient Flask APIs to manage tailored GET and POST requests, and integrated with project frontend.</li></ul>  |                            |
| <b>Patient Monitoring using Activity Recognition</b>   (stack: Flask, Keras, OpenCV, Mediapipe, Unity3D)   | <b>Oct 2022 - Nov 2022</b> |
| <ul style="list-style-type: none"><li>Trained CNN-LSTM and LSTM models to monitor patient's daily activities and generate activity distribution report.</li><li>Created synthetic data, 50000 frames, for 6 different activities using Unity3D and leveraged mediapipe framework to extract 33 body keypoints for each frame as initial features.</li><li>Experimented with pose-normalized distances between 18 pairs of selected keypoints as additional features to achieve 82.4% test classification accuracy on real-world activity videos.</li></ul> |                            |
| <b>Querying on Streaming Data</b>   (stack: Python, Apache Spark, boto3, Pandas, matplotlib)   | <b>Sep 2022 - Oct 2022</b> |
| <ul style="list-style-type: none"><li>Reduced 30% pre-processing time on approx. 130GB (40M records) of data using MapReduce and saved significant storage space by writing data into parquet format.</li><li>Designed a pipeline using Apache Spark in python to consume streaming data and provide real-time visualization on top scholarly works using matplotlib animation.</li></ul>  |                            |
| <b>Text-Conditional Image Generation</b>   (stack: Python, PyTorch, Hugging Face, OpenCV, NumPy)   | <b>Mar 2022 - May 2022</b> |
| <ul style="list-style-type: none"><li>Implemented a Deep Convolutional GAN in multi-GPU setting to generate 256x256 images from textual descriptions.</li><li>Employed 3 text encoders (DistilBERT, CLIP and char-CNN-RNN) to obtain text embeddings and compared their results.</li><li>Improved model training by using 3 different methods: Label Smoothing, Label Noise and Wasserstein-Gradient Penalty.</li></ul>  |                            |
| <b>Smart Health Prediction using Naive Bayes Classifier</b>   (stack: Java, JDBC, HTML, CSS, JavaScript)   | <b>Feb 2017 - Jun 2017</b> |
| <ul style="list-style-type: none"><li>Integrated backend and middleware to enable user classification into 3 disease categories using Naive Bayes.</li><li>Supported in web development for data entry of new users and displaying collected statistics charts.</li></ul>  |                            |

### TECHNICAL SKILLS

**Languages:** Python, SQL, Java, C++, HTML, JavaScript | **IDEs:** VS Code, Jupyter Notebook, Spyder | **OS:** MacOS, Linux, Windows  
**Frameworks and Tools:** PyTorch, sklearn, OpenCV, HuggingFace, NumPy, Pandas, NLTK, Gensim, PySpark, Flask, Git

### CERTIFICATIONS

|  |                 |
|--|-----------------|
| NoSQL, Big Data, and Spark Foundations Specialization – Coursera   IBM | <b>Feb 2023</b> |
| Introduction to Machine Learning on AWS – Coursera   AWS               | <b>Jan 2023</b> |
| Machine Learning – Coursera   Stanford Online                          | <b>Jun 2022</b> |
| Oracle Database SQL Certified Associate                                | <b>Jul 2020</b> |
| Oracle Cloud Infrastructure Foundations Certified Associate            | <b>Jul 2020</b> |
